Wimbledon Education Model®

We will provide all the equipment and support for you to achieve your goals as of the moment you embark Wimbledon experience.

In **WIMBLEDON**, you will not only have the chance to speak English in a fluent, accurate and confident way but be educated to think in English, share your ideas and use the language with efficiency outside the class environment as well.

Wimbledon Language Academy Learning Model® is based on student centered approach. This model consists of three basic stages, *process-based learning, portfolio system and performance management*. In this learning model, a process focused on instructional design is taken into consideration. During the learning process, a huge importance is attached to the personal development of every single student.

At Wimbledon we do not just use the classic education system, which is to know all the grammatical rules, we teach our student how to **speak the language** itself. Our education system is student-centered system which focuses on the students' activities and needs rather than the teacher's.

Learning a foreign language should be in the same way as we learn our mother tongue. It has to be a natural process, knowing the grammatical rules and memorizing vocabulary are not enough.

Our successful instructors constantly work on and prepare lessons which will meet your language acquisition needs and adapt them to the current issues.

You will have more comprehensive knowledge about the language performance by means of four language skills (READING, WRITING, SPEAKING, LISTENING) and gain fluency and practicability.

London Eye

Process-Oriented Learning®

Thanks to “Process-oriented learning” model you can check your language learning process in every second, take information about it and monitor your development

Portfolio System®

With the Portfolio System, which is one of the modern approaches of language learning, students can see and follow their performance and development

Performance Evaluation System®

The skills of the students can only be assessed with exams applied during the training programs; this cannot reflect the real overall knowledge of the student. The aim of this System is to assess the verbal communicative skills along with the written skills making the evaluation more objective.

Language Levels®

The Council of Europe Modern Languages Division constituted The Common European Framework of Reference for Languages with the intention of creating a common foreign language teaching program in Europe and standardizing foreign language teaching with common criteria and developing tools based on this.

Turkey has become part of the Socrates Project with the decision of European Union on 24 January 2000. As a result of this action, English language teaching practices used in Europe have been adopted in Turkey. Wimbledon Academy applies language levels which are constituted by The Common European Framework of Reference for Languages. These levels are not only certificated by the European Language Portfolio but also they are commonly used in English language teaching in all European countries today.

You can check over our education levels.

What Makes Wimbledon Different

Guarantee of Education

We assure that you will reach all your goals related to the target language and we "GUARANTEE" it. Wimbledon Language Academy guarantees to provide the same education to the students free of charge, if the students state that they have not acquired the required skills.

In order to take the same course free of charge students cannot be absent for more than 10% of the whole course.

Certificates

Those who successfully complete our courses will have the chance to take an international Wimbledon Language Academy Certificate. This certificate can serve as a proof in any European countries about the English level and English knowledge of the student.

Students can easily find their certificates online in our "Student System".

European Language Portfolio

In Wimbledon we apply the European Language Portfolio as well as the Common European Framework in our education. European Language Portfolios are provided for each and every single of our students with their names written on them. Students are able to follow their development thanks to this Portfolio. The European Language Portfolio includes the 6 Language levels (A1, A2, B1, B2, C1, C2).

In Wimbledon, courses are organized according to the European Language Portfolio.

Embankment Underground Station

10 People Classes

One of the most important factors after classroom management and learning is classroom size. With its special designed classroom concept and student centered classrooms Wimbledon provides the best environment can ever have for learning.

Education Support Department

In order to make language learning easier and better for our students, our Education Coordinators provide extra support and help about education even outside the classrooms.

Wimbledon Student System

Those students who start learning in Wimbledon are provided with a special Student System with their very own account as well as a password via SMS. They are able to register, follow and monitor their process through this system.

Native Teachers

In Wimbledon, our native teachers try to help student to achieve their desired goals

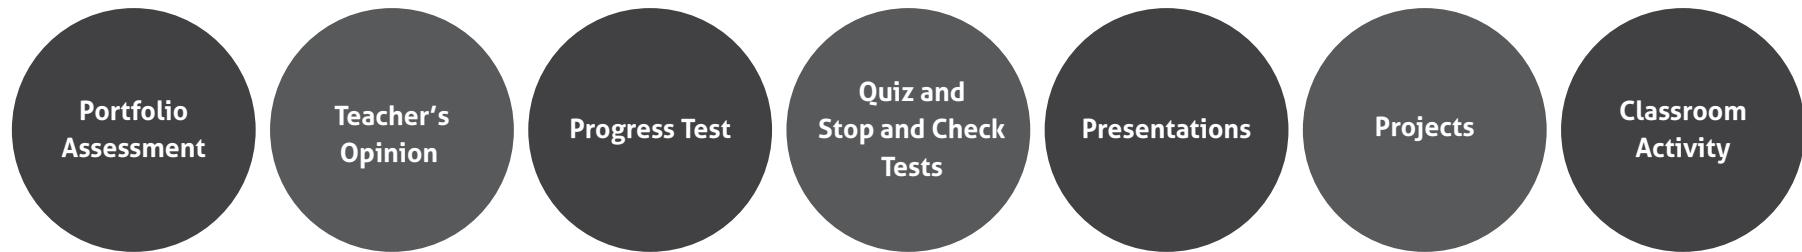

Life-long free of charge activity program

To make sure that our students will not lose their acquired language but keep their knowledge in the same level, we offer life-long free of charge activities.

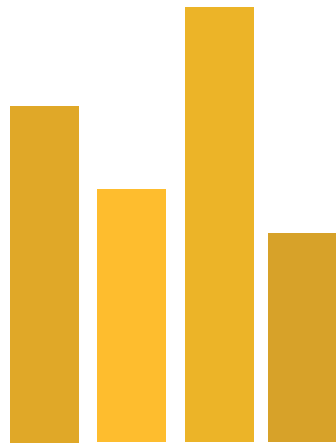

Wimbledon Evaluation System

In the exams applied during the training programs only the writing skill of the students can be assessed; this cannot reflect the real overall knowledge of the student. The aim of this System is to make evaluation more objective by assessing the verbal communicative skills along with the written skills.

Our exams have been arranged on the basis of various evaluation approaches.

Corporative Reporting

In Wimbledon Language Academy 's Corporative Education programs, we offer corporative reporting for institutions.

Corporative reporting takes place in two terms, both during and at the end of the education period.

The attendance, participation in club activities, classroom performance, evaluation reports, stop and check results are immediately uploaded to wimbledonobs software and all these information is forwarded to the companies during the learning process through the software.

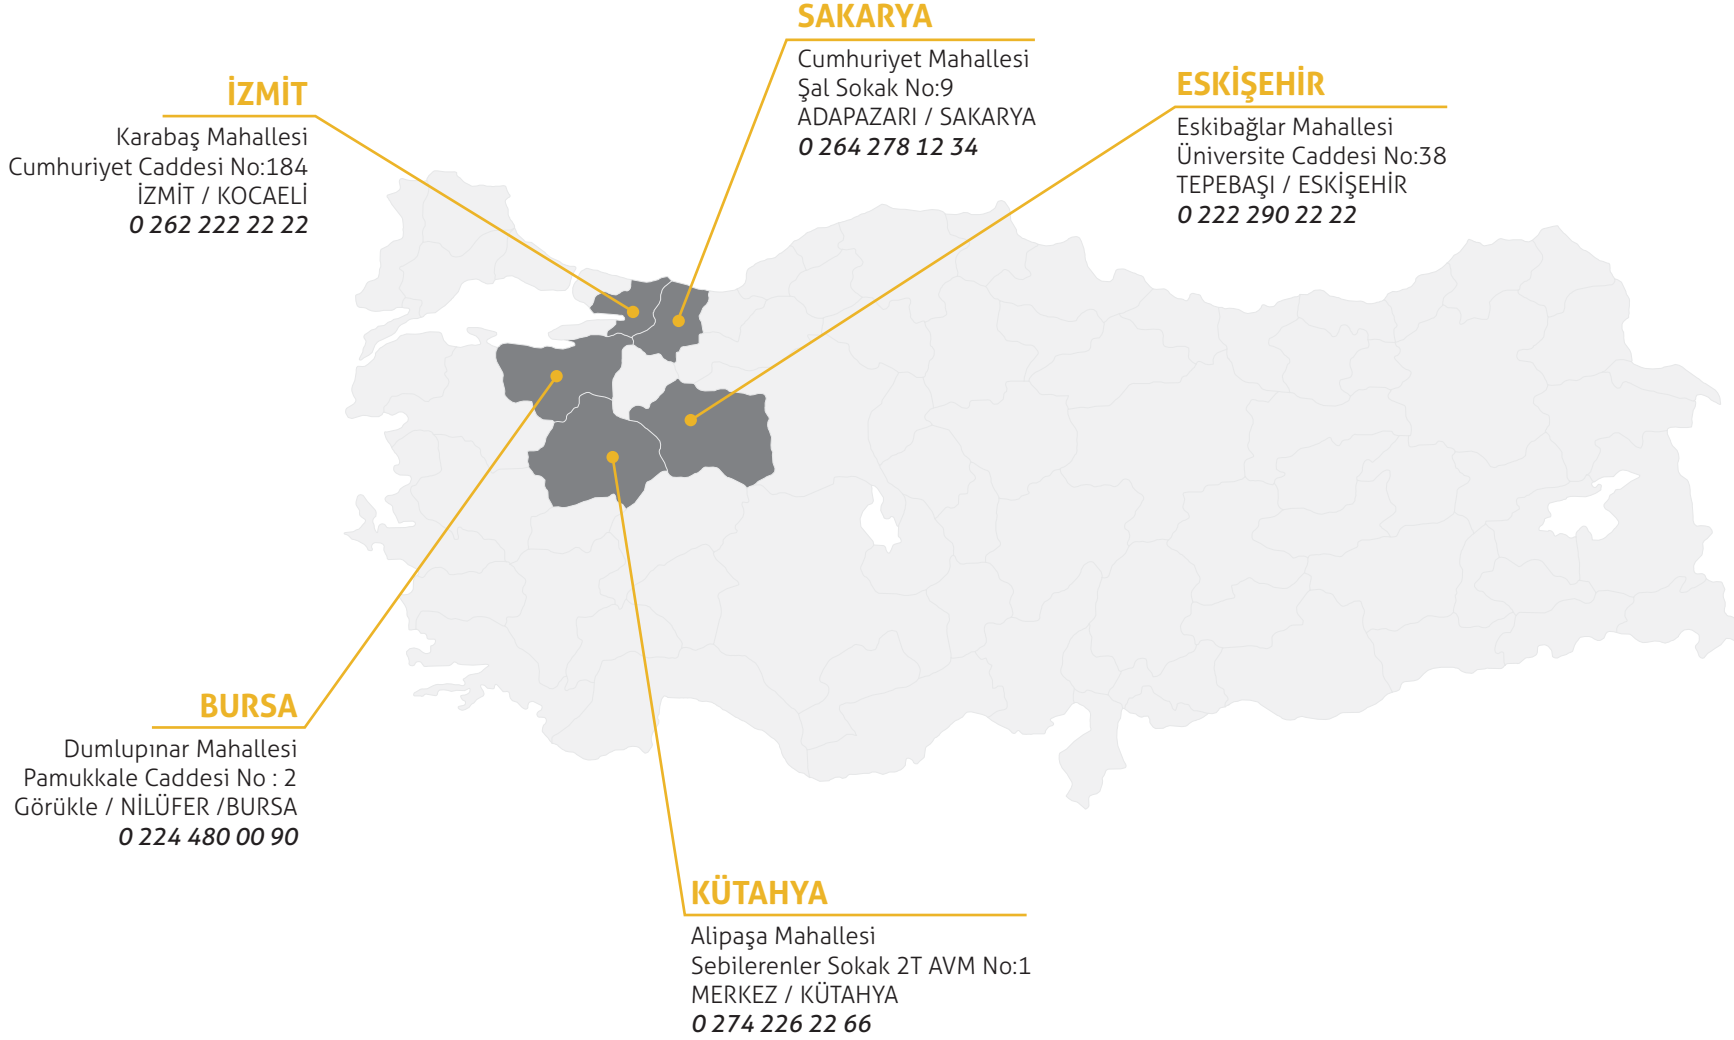

The results, the ratio about the general attendance of lessons and activity clubs, reports are also provided at the end of the course for the companies.

We are also organizing meetings during the education period regarding the evaluations.
